

Lesson 5: Don't Waste a Good Idea

Planning Sheet

Your challenge is to identify one realistic idea that could help reuse, reduce, recycle or recover waste in your home, school or community. It can be a simple idea that can be implemented at home or school, or a more complicated one that you would like to persuade a local company or the local government to implement.

For this challenge, you must:

1. Identify your idea.
2. Create a plan for your idea (see below).
3. Design a project to persuade a person or group to turn your idea into a reality. Your persuasion project must include two different persuasion techniques and

My waste management idea is:

This relates to one or more of the four R's by:

It is a good idea because:

My idea could be implemented by:

I could measure the success of my idea by:

Think Green.[®]
